The lab-frame equations of RHD consist of the Euler equations of hydrodynamics combined with the frequency-integrated zeroth- and first-order angular moments of the radiative transfer equation given by. Moon ? Furthermore, in the optically thick limit with provided is also satisfied, Equation 87 yields a radiation-modified acoustic wave .

For these reasons, many algorithms adopt implicit integration schemes, which offer stability and larger time steps at the price of lower accuracy and higher computational cost per time step. Nuovo Cimento, Ledoux and Th.
