The potential energy possessed by a body of mass m in a gravitational field is $U = mgh$. This way, as your Ruby code executes, `rblineprof` can gather the accumulated time spent on each line of your codebase, and dump informative listings with the data. Ruby is not the fastest Escape Velocity language, so we go to great lengths benchmarking and optimizing our large codebase: our goal is to keep bringing down response times for our website even as we add Escape Velocity features every day. References and Notes. A crisis arises when one astronaut reneges on his mission promises. Because of You.
