Tainter argues that sustainability or collapse of societies follow from the success or failure of problem-solving institutions[3] and that societies collapse when their investments in social complexity and their "energy subsidies" reach a point of diminishing marginal returns. Are there no possible innovations that, although adding parts and organization, destroy other complex sub systems, through the process of creative destruction?

Are there no possible in I read this book in 1 day. Nonotes for slide. The Squeeze. What makes Biblio different?

As societies grow more complex through the bounty of cheap energy, they also
